

# OLA Illegal Protective Equipment Enforcement Policy

**Situation 1:** The player has approved/legal protective equipment (properly installed and worn). This creates no problem as the player complies with the intent of the equipment rules and policies.

**Situation 2:** The player is wearing approved/legal protective equipment (and has the intent of complying with the equipment rules and policies) BUT it is either worn incorrectly or is installed incorrectly, or both (for various reasons). In these situations, the problem CAN be corrected on the spot.

**Situation 3:** The player is wearing unapproved/illegal protective equipment (and has no intent of complying with the equipment rules and policies) and the problem CANNOT be corrected on the spot.
